I hereby claim the benefit under Title 35, United States Code, § 120 of any United States Application(s) listed below and, insofar as the subject matter of each of the claims of this reissue application is not disclosed in the prior United States Application in the manner provided by the first paragraph of Title 35, United States Code, § 112, I acknowledge the duty to disclose material information as defined in Title 37, Code of Federal Regulations, § 1.56(a) which occurred between the filing date of the prior application and the national or PCT international filing date of this reissue application.

08/993,992	December 18, 1997	Issued U.S. Patent No. 5,598,760
(Application Serial No.)	(Filing Date)	(Status: Patented, Pending, Abandoned)

### Statements of Applicant Pursuant to 37 CFR 1.175

This reissue application, enclosed herewith, is filed pursuant to 35 U.S.C. 251 in order to seek a broadening reissue of the claims of U.S. Patent No. 5,987,760. This reissue application is filed within two years of the grant of U.S. Patent No. 5,987,760.

Applicant believes the original patent (U.S. Patent No. 5,987,760) to be partly inoperative or invalid by reason of the patentee claiming less than patentee had the right to claim in the patent.

Applicant relies upon at least one error which supports this reissue application. For instance, the error which is relied upon by the Applicant to support this reissue application is the inclusion in original claim 1 of the language "a position of each starting point of each line being 1mm farther away from the center of said outer board consecutively", which is less than the patentee had the right to claim in the patent.

All errors which are being corrected in the present reissue application up to the time of filing of this declaration arose without any deceptive intention on the part of the Applicant.

### DECLARATION

I declare that all statements made above of my own knowledge are true and all statements made on information and belief are believed to be true; and these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and such willful false statements may jeopardize the validity of the application or any patent issuing thereon.
